

**AMENDMENT AGREEMENT
REGISTRATION SERVICE PROVIDER AGREEMENT(S)
("RESELLER AGREEMENTS")
TO ALLOW FOR ACCESS TO REGISTRANT USER NAMES AND PASSWORDS**

This Amendment Agreement by and between:

ResellOne.net

("ResellOne")

and

("Reseller")

WHEREAS the parties to this agreement have signed a Reseller Agreement;

AND WHEREAS the parties are desirous to amend the Reseller Agreement so as to enable Reseller to modify Customer (as defined in the Agreement) account information and hereby agree as follows:

ResellOne shall provide Reseller with access to the user names and passwords provided to each of Reseller's Customers in order that Reseller can make changes to account information for domain names on behalf of the Customer. The user names and passwords shall be provided to Reseller by providing Reseller with the ability to download an unencrypted "flat file." In the event that a user name is being used to register domain names in more than one reseller's account, Reseller shall not be provided with access to said user name or password.

Reseller expressly acknowledges and agrees that it shall modify Customer account information in accordance with the instructions of the Customer and the policies of ResellOne.

In the event that a dispute arises between Reseller and a Customer as a result of any modification to a Customer's account, ResellOne shall be entitled to rely on the Agreements so as to require Reseller to provide any necessary indemnification.

ResellOne reserves the right, at its sole discretion, to revoke Reseller's access to Customer user names and passwords at any time.

Save and except as outlined above, all terms and conditions agreed by the parties in the Agreement shall remain in full force and effect. This Amendment Agreement shall be effective as of the later of the two dates noted below.
